AMENDMENTS TO THE CLAIMS

Please amend claims 1, 29, 55, 57, and 59-61, and cancel claims 5, 6, 12, 13, 33, 34, 40 and 41 as set forth below.

1. (Currently Amended) A method comprising:

receiving an interest signal indicating an interest in a hyperlink contained in [[the]] \underline{a} first document;

generating a request for <u>online</u> third-party-provided information about a second document associated with the hyperlink, <u>wherein the third-party-provided information</u>

<u>comprises a content snippet of the second document and is provided by a source other than a publisher or author of the second document the third-party-provided information providing an indication of the disruptiveness and/or liveness of the second document;</u>

receiving the third-party-provided information; and

causing the third-party-provided information to be output in association with the first document.

- 2. (Original) The method of claim 1, further comprising logging the interest signal.
- 3. (Original) The method of claim 1, wherein the third-party-provided information comprises user-related information.
- 4. (Original) The method of claim 3, wherein the user-related information comprises query-related information.

5.	(Canceled).			
6.	(Canceled).			
7.	(Original)	The method of claim 1, wherein the third-party-provided information		
comprises past-user information.				
8.	(Original)	The method of claim 7, wherein the past-user information comprises a		
user-supplied rating of the second document.				
9.	(Original)	The method of claim 7, wherein the past-user information comprises at		
least one of: a period of linger time, a quantity of repeat visits, a quantity of repeat queries,				
and a quantity of click-throughs.				
10.	(Original)	The method of claim 1, wherein the third-party-provided information		
comprises a genre of the second document.				
11.	(Original)	The method of claim 1, wherein the third-party-provided information		
comprises a relationship of the first and second documents.				

(Canceled).

12.

- 13. (Canceled).
- 14. (Original) The method of claim 1, wherein the third-party-provided information comprises a query corresponding to the second document.
- 15. (Previously Presented) The method of claim 1, wherein the third-party-provided information comprises a comparison between content from the first document associated with the hyperlink and content from the second document.
- 16. (Original) The method of claim 1, wherein the third-party-provided information comprises a cached representation of a previously-available second document.
- 17. (Original) The method of claim 1, wherein the interest signal comprises an indication of a pointing device hovering over the hyperlink.
- 18. (Original) The method of claim 1, wherein the interest signal comprises an indication of a right-click of a pointing device on the hyperlink.
- 19. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information in an overlay.
- 20. (Original) The method of claim 19, wherein the overlay comprises a tooltip.

- 21. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information in a status bar.
- 22. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information in a right-click menu.
- 23. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information in a pop-up window.
- 24. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information in a persistent window.
- 25. (Original) The method of claim 1, wherein output in association with the first document comprises displaying the third-party-provided information with the first document.
- 26. (Original) The method of claim 1, wherein output in association with the first document comprises audibly outputting the third-party-provided information.
- 27. (Original) The method of claim 1, wherein output in association with the first document comprises outputting the third-party-provided information through a haptic device.

28. (Original) The method of claim 1, wherein output in association with the first document comprises outputting a hyperlink associated with a third document, the third document comprising the third-party-provided information.

29. (Currently Amended) A method comprising:

receiving a request for <u>online</u> third-party-provided information about a second document associated with a hyperlink contained in a first document, <u>wherein the third-party-provided information comprises a content snippet of the second document and is provided by a source other than a publisher or author of the second document the third-party-provided information providing an indication of the disruptiveness and/or liveness of the second document;</u>

retrieving the third-party-provided information; and generating an information signal configured to cause the third-party-provided information to be output in association with the first document.

- 30. (Previously Presented) The method of claim 29, further comprising logging the request.
- 31. (Original) The method of claim 29, wherein the third-party-provided information comprises user-related information.
- 32. (Original) The method of claim 31, wherein the user-related information comprises query-related information.

33.	(Canceled).			
34.	(Canceled).			
35.	(Original)	The method of claim 29, wherein the third-party-provided information		
comprises past-user information.				
36.	(Original)	The method of claim 35, wherein the past-user information comprises		
a user-supplied rating of the second document.				
37.	(Original)	The method of claim 35, wherein the past-user information comprises		
at least one of: a period of linger time, a quantity of repeat visits, a quantity of repeat queries,				
and a quantity of click-throughs.				
38.	(Original)	The method of claim 29, wherein the third-party-provided information		
comprises a genre of the second document.				
39.	(Original)	The method of claim 29, wherein the third-party-provided information		

(Canceled).

40.

comprises a relationship of the first and second documents.

- 41. (Canceled).
- 42. (Original) The method of claim 29, wherein the third-party-provided information comprises a query corresponding to the second document.
- 43. (Previously Presented) The method of claim 29, wherein the third-party-provided information comprises a comparison between content from the first document associated with the hyperlink and content from the second document.
- 44. (Original) The method of claim 29, wherein the third-party-provided information comprises a cached representation of a previously-available second document.
- 45. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information in an overlay.
- 46. (Original) The method of claim 45, wherein the overlay comprises a tooltip.
- 47. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information in a status bar.
- 48. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information in a right-click menu.

- 49. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information in a pop-up window.
- 50. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information in a persistent window.
- 51. (Original) The method of claim 29, wherein output in association with the first document comprises displaying the third-party-provided information with the first document.
- 52. (Original) The method of claim 29, wherein output in association with the first document comprises audibly outputting the third-party-provided information.
- 53. (Original) The method of claim 29, wherein output in association with the first document comprises outputting the third-party-provided information through a haptic device.
- 54. (Original) The method of claim 29, wherein output in association with the first document comprises outputting a hyperlink associated with a third document, the third document comprising the third-party-provided information.
- 55. (Currently Amended) A computer-readable <u>storage</u> medium on which is encoded program code, the program code comprising <u>code for</u>:

program code for receiving an interest signal indicating an interest in a hyperlink contained in a first document;

program code for generating a request for <u>online</u> third-party-provided information about a second document associated with the hyperlink, <u>wherein the third-party-provided</u> information comprises a content snippet of the second document and is provided by a source other than a publisher or author of the second document the third-party-provided information providing an indication of the disruptiveness and/or liveness of the second document;

program code for receiving the third-party-provided information; and
program code for causing the third-party-provided information to be output in
association with the first document.

- 56. (Original) The computer-readable medium of claim 55, further comprising program code for logging the interest signal.
- 57. (Currently Amended) A computer-readable <u>storage</u> medium on which is encoded program code, the program code comprising <u>code for</u>:

program code for receiving a request for online third-party-provided information about a second document associated with a hyperlink contained in a first document, wherein the third-party-provided information comprises a content snippet of the second document and is provided by a source other than a publisher or author of the second document—the third-party-provided information providing an indication of the disruptiveness and/or liveness of the second document;

program code for retrieving the third-party-provided information; and

program code for generating an information signal configured to cause the thirdparty-provided information to be output in association with the first document.

- 58. (Previously Presented) The computer-readable medium of claim 57, further comprising program code for logging the request.
- 59. (Currently Amended) The method of claim 1, wherein the third-party-provided information provides [[providing]] an indication of [[the]] disruptiveness or and/or liveness of the second document by comparing content from the first document associated with the hyperlink and content from the second document.
- 60. (Currently Amended) The method of claim 1, wherein the third-party-provided information provides [[providing]] an indication of [[the]]] disruptiveness or and/or liveness of the second document comprises by comparing a previously available version of the second document with a current version of the second document.
- 61. (Currently Amended) The method of claim 1, wherein the third-party-provided information provides [[providing]] an indication of [[the]]] disruptiveness or and/or liveness of the second document by determining if the second document has at least one feature selected from the group consisting of: pop-ups, music and potential computer viruses.
